Subject: Item PW27.10 Telecommunications - Authority to Permit the Installation of Stand-Alone Antenna Poles

Please send my comments to all Councillors before Monday's Council meeting.

I am writing to ask Toronto Council to vote against item PW27.10. Our public rights-of-way are not an appropriate place for a standalone, under 15m cell tower with an equipment box.

There is no question that microwave radiofrequency radiation from all wireless devices is not safe, and will at some point in the future be reclassified under the WHO as a Class 1 absolute carcinogen, currently being a Class 2B possible human carcinogen. Once you allow cell towers under 15 m, there will be no escape from complete and wholesale toxic exposure, as the telecom industry will put these antennae on as many locations as possible, their modus operandi being to roll out devices as quickly as possible, before they can no longer contain the knowledge of harm caused by same. Where can people go to be safe when the very air around them is laden with an invisible poison, pulsing with microwave frequencies that disrupt cellular function. This is know now, but the intention of industry is to conceal the truth.

You as council have the information that wireless exposure is a health risk to all biological systems. You cannot plead ignorance at a future date for standing by or supporting the sickening of your population for the sake of corporate profit. We in British Columbia look to Toronto Councillors to lead the way in restoring democratic, civil and human rights by reining in the control of the telecom industry in this regard. Such a health risk as a WHO Class 2B possible carcinogen should be removed from society wherever possible, not forced onto every street, every byway, every highway and therefore into every home and life, from the baby in the womb, to the elderly in the care home.

To allow this kind of wholesale exposure to microwave radiofrequency radiation is to fast track the demise of a healthy and well-functioning society. Stand firm, ladies and gentlemen, as this is without question the right thing to do at this time.

Sincerely,

Una St.Clair
