

Petition EY29.38.1
Submitted by
Cllr. Palacio

I am petitioning Transportation Services to investigate the feasibility of converting the existing private laneway at the rear of 146 to 166 Osler Street and 9 to 37 Miller Street, which would be symmetrical to the public laneway north of Lindner Street, which was converted a few years ago.

I believe that the assembling costs of the public laneway can be recovered through the benefiting assessment of properties adjacent to the proposed laneway. In terms of the width of the laneway, I believe that the existing width has not been an issue, in any way.

The first laneway south of St. Clair Avenue West, off of Spring Grove Avenue, westbound (which is narrower), was recently converted and upgraded.

Therefore, I strongly support the conversion of the subject laneway and urge the City to take appropriate measures to initiate the process.
