Subject: Letter urging approval of new smoking restrictions

HL 24.8

Hello,

As a citizen of Toronto who constantly is exposed to second-hand smoke against my will and is having his health affected by other's poor decision to smoke, I strongly urge you to approve the report recently released by the Medical Officer of Health. Smoking is a destructive act and that is the business of the smoker, but when it comes to exposing innocent citizens (who have chosen never to smoke in their lives), that is disrespectful, disgusting, inconsiderate but more importantly, harmful to those people's health.

Ultimately, I believe smoking should be banned everywhere and Ontario should become the first smoke-free province. Until that time, I strongly urge you to continue placing restrictions on smoking in the City of Toronto.

Thank you very much,

Peter
