Dear Chair Augimeri and Council Members,

RE: Request for an All Way Stop at Northcliffe Boulevard and Allenvale Avenue

SUMMARY:

As the Councillor for the area and on behalf of area residents, I am writing to request Council members support the installation of an all way stop control at the intersection of Northcliffe Boulevard and Allenvale Avenue.

Northcliffe Boulevard is the only street in the area that connects St. Clair Avenue West with Eglinton Avenue West and from Rogers Road to Eglinton Avenue West there are only three stop controls. This street, therefore, is used by vehicles as a direct passage to Eglinton Avenue West and allows vehicles to pick-up significant speed. I frequently receive calls from local residents about speeding on this street.

Due to the steep grading north of this intersection, it is not possible to have stop control measures one block north at Keywest Avenue. Therefore the installation of much needed stop controls in this area can only be made at Allenvale Avenue.

Residents’ daily experience of high traffic volumes and speeding motorists is of great concern as it impacts the safety and well being of their families and community.

The installation of an all way stop control at this intersection would provide a safer environment for families living on this street.

Thank you for your consideration of these comments and for your support of this request.

RECOMMENDATION:

That North York Community Council direct Transportation Services to:

1. Install an all way stop at the intersection of Northcliffe Boulevard and Allenvale; and
2. Amend all related by-laws accordingly.

Sincerely,

Josh Colle
Councillor
Ward 15, Eglinton-Lawrence
