Submission to the City of Toronto Planning & Growth Management Committee Mar. 6, 2013 Meeting

Dear Councillors:

This letter is from the Canadian Fuels Association, to the City of Toronto Planning & Growth Management (P&GM) Committee, regarding Item PG 21.1 – Revised Draft City-wide Zoning By-law, on the March 6, 2013 P&GM meeting agenda.

The Canadian Fuels Association supports the recommendation from the City Planning Division on page 31, of the January 22, 2013 Report from the Chief Planner and Executive Director. This recommendation replaces regulation 150.80.20 (6), with wording that addresses the unique situation of a drive through facility and a vehicle fuel station on a corner lot, in allowing the drive through stacking aisle to be in the side yard between the building and the street. This recommendation addresses the regulatory safety issues that the City summarized on page 10 of the report, and Canadian Fuels has outlined in prior deputations to the P&GM.

Canadian Fuels thanks City Planning for their work to understand the issue and recommend an acceptable compromise solution, which addresses this unique situation, and resolve this issue.

Sincerely,

Eric A. Bristow
Director Government & Stakeholder Relations, Canadian Fuels Association
