Dear Ms. Watkiss,

**Re: Administrative Inquiry Regarding Strategy to Underground Hydro Wires:**

In 2014, Council approved a direction to request the City Manager to work on a report with Toronto Hydro on a strategy to underground hydro wires.

I request a status report on this work. I note that the black-outs of early March 2015 could have been avoided had the hydro system, or key pieces of it, been undergrounded.

My request is an update on where this report is at and specifically, when it will be coming to Council for debate and discussion in the new term.

Sincerely,
