Planning and Growth Management Committee

Re: Planning considerations for Canada Post's Community Mailbox Implementation

Dear colleagues of Planning and Growth Management Committee,

I am requesting your support for the following recommendation:

1. That the Chief Planner and Executive Director, City Planning, in consultation with all appropriate City divisions, report to Planning and Growth Management Committee at its June 18, 2015 meeting, on the impact of Canada Post's Community Mailboxes on the urban environment, future developments, the public realm and urban design.

Background

Canada Post is changing its service delivery system to move away from home delivery and toward a community mailbox model. The implementation of these new community mailboxes may have impacts on the urban environment, as well as future planning and development. It is important that these changes and resulting impacts are understood and can be addressed by the City of Toronto.

Your support for this request would be appreciated.

Sincerely,

Councillor David Shiner
Chair, Planning and Growth Management Committee
