As noted in CORRA's letter, there has been little or no time for LPCC to review the information on the agenda, or to even write a letter at this last minute to the Planning and Growth Management Committee.

The continuing problem is that Planning Staff do not consider ongoing public consultation an important component of planning for our neighbourhoods, communities and City.

This can be resolved with LEGISLATED Community Boards, which would require Staff to properly consult with residents and give residents an appropriate amount of time to respond.
