Our association welcomes and understands the need and importance of ongoing development in consultation we all stakeholders .

We are extremely disappointed with the actions of the planning department by working against the wishes of the community , Councillor Josh Colle and the guidelines set out in the Dufferin study.

The current proposal for 3130 Dufferin street does not meet the vision for Dufferin street , are a clear example of undesirable tactics and not within a spirit of cooperation.

Please join our community and Councillor Colle in voting **against** this development and lets find a win-win solution .

Thank you
