#### Summary

The Disability, Access and Inclusion Advisory Committee, at its meeting on September 1, 2016, considered Item DI11.4 and established Working Groups on the Built Environment and Education and Communications. We would like the Committee to have a further discussion about the working groups.

We would like to propose the Committee consider renaming the two Working Groups that were established and to create two additional Working Groups as we think these four working groups

would reflect the interests and priorities of the Committee:

- The Working Group on the Built Environment should be renamed as "Housing and Built Environment"
- The Working Group on Education and Communications should be renamed as "Communications"
- Two new working groups be added on "Transportation" and "Employment".
