Re: Supervised Injection Services for Toronto

We are writing this note to show strong support for the initiative to provide supervised injection services in Toronto, and more specifically for the Methadone Works; Toronto Public Health. We have been in the community for more than 10 years and have seen our fair share of street drug use. We feel that this initiative will provide for safer streets overall harm reduction for our city. We apologize for not being able to show our support in person. Please feel free to contact us for further meetings or for anything else we can help provide.
