RE: LS11.2 Chapter 591, Noise – Amendments After Further Review

Dear Councillor Cesar Palacio, Chair, and Members of the Licensing and Standards Committee (LSC),

We believe that developing an appropriate Noise Management Plan is crucial for our City and that the needs of residents and businesses can be accommodated. However we submit that the City's current proposals have serious flaws. The Toronto Noise Coalition (www.torontonoisecoalition.ca) has been formed to reconsider these issues and has recently put forward proposals for a more effective approach to a noise bylaw. The TNC recommends a 7 point plan for moving forward. The issues addressed include general protection against unwanted noise, and the issues of construction noise, amplified noise and leaf blowers. The TNC proposals are at http://media.wix.com/ugd/a0d3a0_0a5a0fcb8d3941d5a90919e9e4e480d4.pdf

As such, we request the following:

1. That the LSC not recommend the staff report and its recommendations to City Council
2. That instead the LSC recommend that City Council request staff to review the Toronto Noise Coalition proposals and report back to the Committee in September 2016
3. That the LSC recommend that an advisory committee be appointed including members of the Toronto Noise Coalition

Thank you for your consideration of these comments and recommendations.

Respectfully submitted,

Geoff Kettel for

Geoff Kettel and Carol Burtin Fripp
Co-Presidents

c.c. Mayor John Tory
Councillor Jon Burnside
Councillor Krystin Wong-Tam
