

STAFF REPORT ACTION REQUIRED

Metrolinx Eglinton Crosstown LRT Corridor Long-Term Road Closure and Temporary Traffic Signal Approval - PLACEHOLDER

Date:	June 2, 2016
To:	Public Works and Infrastructure Committee
From:	General Manager, Transportation Services
Wards:	All
Reference Number:	P:\2016\Cluster B\TRA\TIM\pw16013tim

SUMMARY

The purpose of this report is to seek approval from Toronto City Council for the closure of more than one year of a number of traffic lanes and two side street locations to enable construction of the Metrolinx Eglinton Crosstown LRT, along with temporary traffic control signals to provide for safe pedestrian crossing of Eglinton Avenue. In addition, this report seeks authority for a number of short-term weekend closures of W. R. Allen Road ramps at Eglinton Avenue to enable them to be realigned and remain in operation whilst the LRT station at that location is constructed.

This placeholder report is being issued to allow staff an opportunity to complete consultations with Metrolinx and the affected Councillors. This report will be brought forward to the Public Works Infrastructure Committee at its meeting of June 20, 2016.
