Re: Liberty New Street – Environmental Assessment Study

Kevric Real Estate Corporation Inc. would like to express our support of the Liberty New Street Project.

As transportation through the Liberty Village area has progressively become more difficult due the positive and steady growth of the neighborhood, it is evident that the "New Street" would relieve traffic improve circulation for all modes of transportation.

The new street would not only relieve the heavy amounts of traffic that flow through the area (both business and residential congestion), but would also support further economic development.

We strongly support the inclusion of this project in the City of Toronto capital budget program.

Regards,
