Hello,

I received this notice of public meeting that invited me to make a comment. My two cents as follows:

I object to this request solely on the basis that "no new development is proposed". Since there is no new development, I see no reason why the zoning needs to be changed. I see no purpose to changing the zoning other than taking up a lot of people's time and money to process and make this change official. I object to my tax dollar being wasted like this.

sincerely,
