

Why the ravine strategy is necessary — and why it needs funding.

## YELLOW CREEK / VALE OF AVOCA

An example of the current state of too many of Toronto's ravines.

Presentation by Vale of Avoca consortium  
of neighboring residents' associations

Collapsed gabion banks, through narrow part of stream

Washed-out western-side path north of St Clair bridge

Washout undercutting eastern path, south of St Clair bridge

Tree that was still standing in May 2017 photo

Washed out southern bridge, looking back across former path

Washout near remaining (northern) threatened bridge

Trees across western stream-side path

Another tree partly blocking stream
