Speed Humps on Simpson: Howland to Logan

Dear Chair and Members of the Toronto and East York Community Council

In 2015 speed humps were approved for Simpson Avenue between Broadview and Howland. Recently I have received a petition from the residents of Simpson Avenue between Howland and Logan, asking for the traffic calming to be extended to their block.

Speed humps on this small block would make sure that the traffic that has been slowed down between Broadview and Howland remains slow to ensure the safety of residents, pedestrians and cyclists between Howland and Logan.

The petition contains signatures from almost every household on the block so I would like to thank the residents for their hard work and thoroughness.

Recommendations:

Toronto and East York Community Council:

1. Direct Transportation Services to study traffic calming on Simpson Avenue between Howland and Logan and report back to the October 17th, 2017 Community Council meeting.

Sincerely,

City Councillor
Ward 30, Toronto Danforth
