PW31.10 Text of Form Email:

Dear Clerk,

I'm calling on you to take action and explore all options and tools to stop the use of non-recyclable and harmful plastics in Toronto.

Disposable products and excessive packaging are causing major harm to the environment both when they are produced and at the end of their life.

Black plastic, coffee pods, take out cups and 'compostable' products are just some of the single-use plastics that are polluting our environment and contaminating our recycling system. New single-use products and plastics are being put on the market every day and we residents and our recycling facilities can't keep up!

This contamination could cost the City of Toronto up to \$9 million extra this year alone.

As other levels of government consider actions on plastic, Toronto can join the fight. I'm happy that Toronto Council asked staff to investigate what powers the City has to reduce or eliminate problem single-use materials with bans, fees, restrictions or other tools.

When City Staff reported back to PWIC, they recommended a plan to intensively consult with the public, businesses and other stakeholders to identify if and how the City should take action to deal with problem wastes like single-use plastics and packaging. The Public Works & Infrastructure Committee agreed, and asked staff to get the consultation done in the next 6 months.

This is Council's opportunity to show leadership by showing that it's willing to take a serious look at options, to really listen to Torontonians and to take concrete actions.

Can I count on you to show your support for immediate action on plastic waste?

Sincerely,
