Dear Council,

I am writing to show my support for MM44.35.

The anti-abortion protesters are making the public a captive audience and forcing them to see their disturbing, obscene and large signs when they protest on sidewalks at all four corners of major Toronto intersections. They also target locations outside of daycares and schools where we walk around with young children.

These graphic signs are incredibly upsetting to children and the vulnerable (such as women who have lost children, had miscarriages, or had an abortion themselves.) While these protestors are entitled to their opinions, they shouldn't have the right to infringe upon public peace and security including the peace and security of perceptive minors.

Sincerely,
