PW31.10 - Multiple communications from 696 individuals similar to the following:

Dear Public Works and Infrastructure Committee,

I'm calling on you to take action and explore all options and tools to stop the use of non-recyclable and harmful plastics in Toronto.

Disposable products and excessive packaging are causing major harm to the environment both when they are produced and at the end of their life.

Black plastic, coffee pods, take out cups and 'compostable' products are just some of the single-use plastics that are polluting our environment and contaminating our recycling system. New single-use products and plastics are being put on the market every day and we residents and our recycling facilities can't keep up!

This contamination could cost the City of Toronto up to \$9 million extra this year alone.

As other levels of government consider actions on plastic, Toronto can join the fight. I'm happy to see that Toronto Council asked staff to investigate what powers the City has to reduce or eliminate problem single-use materials with bans, fees, restrictions or other tools.

When staff report in July on PW28.8 about what the City can do to reduce single-use plastics, I want to see immediate actions to stop plastic pollution.

Can I count on you to show your support for immediate action on plastic waste?

Sincerely,

Note to PWIC Clerk: Please distribute my communication to the members of the Public Works Works and Infrastructure Committee before the July 10th meeting that will discuss a report related to Agenda Item PW28.8.
