Re: All Way Stop Control Janda Court/ Quinella Drive/ Triple Crown Avenue

Dear Chair and Members of Etobicoke York Community Council,

In May 2019, Transportation Services staff conducted an All Way Stop Control study for the intersection of Janda Court/ Quinella Drive/ Triple Crown Avenue. The warrants for the implementation of the All Way Stop were not met at this time.

Residents in this community continue to be concerned with the lack of controls at this intersection as it does have a heavier pedestrian traffic flow. Janda Park playground and Triple Crown parkette are directly to the north of this intersection.

A pedestrian pathway is also located directly across from this intersection. This pathway leads to a local soccer field and is a connection to the sidewalk on Hwy 27. Many residents make their way from within the community to the pedestrian pathway so they can walk along Hwy 27 south to Woodbine Mall or north to Humber College.

The recommendation below would permit the installation of an All Way Stop Control at this intersection of Janda Court/ Quinella Drive/ Triple Crown Avenue.

Recommendation

Etobicoke York Community Council:

1. Authorize an All Way Stop Control at Janda Court/Quinella Drive/Triple Crown Avenue.

Thank you for your consideration,

Michael Ford
Toronto City Councillor
Ward 1, Etobicoke North
