Re: Accessibility on the Underground PATH System

Summary:

I would like the Committee to hear from City of Toronto staff about accessibility considerations for the underground PATH system. Specifically, whether after-hours accessibility can be improved, and whether the possibility of creating an accessibility map has been considered

Recommendations:

I recommend to the Toronto Accessibility Advisory Committee that:

1. The Deputy City Manager, Infrastructure and Development Services, arrange for a staff presentation to the Toronto Accessibility Advisory Committee in the first quarter of 2020 regarding accessibility in the underground PATH system, including:
 - a. after-hours PATH access; and
 - b. an accessibility map.

Michael McNeely

Member of the Toronto Accessibility Advisory Committee
