Attachment 12
Proposed Major Arterial Speed Limit Reductions

TORONTO’S VISION ZERO ROAD SAFETY PLAN
The speed limit on major arterial roads with a speed limit of 60 km/hr higher are proposed to be reduced by 10 km/h with the exception of roadway segments that meet one or more of the following criterion. The criteria exclude road segments where lower speed limits would be artificially low for the existing road environment and create significant speed differentials, which would be a safety concern.

- Sections just off of Highway 401 (typically between on/off ramps)
- Sections through industrial areas
- Sections with limited number of driveways present and/or very large boulevards with setback sidewalks

In addition, the speed limit on some major arterial roads within newly identified Pedestrian Safety Corridors are proposed to be reduced by 10km/h as per existing practices for these zones.
