## **Summary**

83 Alexander Street, the Church Street Junior Public School, is a significant green space and children's education facility. The Toronto District School Board is investing in ongoing capital investments on the site and additional Section 37 funds were allocated to enhance this work with a decorative fence feature for the south-west edge of the property in 2017 and 2018. Work is anticipated to take place this summer and additional opportunities to improve site safety, security and the state of good repair have been identified. The fencing and gates located along the north side of the grounds, as well as the northern stretch of the school property on Mutual Street are currently chain link and upgrading this remaining portion would represent a comprehensive improvement and take advantage of imminent construction.

Council approved Implementation Guidelines for Section 37 provide state that:

Cash contributions toward the capital improvement of school board playgrounds are eligible S.37 community benefits where the playground serves as a local park, where the public will continue to have reasonable access for the foreseeable future, and where there is no local City-owned parkland performing a similar function in the same community that could otherwise benefit from the cash contribution.

Capital improvements to the Church Street Junior Public School's street edge space would comply with the Section 37 Agreement and the Council approved Guidelines.

Prior to receiving the funds, the Toronto District School Board will be required to sign a Community Access Agreement which will contain provisions governing the purpose of the funds, the financial reporting requirements and access to the playground at the school. The Community Access Agreement will be executed between the City and the Toronto District School Board, drawn up in consultation with the local Councillor.
