

**Traffic Calming Summary**  
(Pineway Blvd between Bernick Rd and Weatherstone Cres)  
All three of the following warrants must be achieved

| Warrant                                                                                            | Criterion                   | Requirement                                                                                                                                                                                                                                    |                                                                                           | Warrant Satisfied               |     |
|----------------------------------------------------------------------------------------------------|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|---------------------------------|-----|
| Warrant 1<br>Petition                                                                              | 1.1<br>Petition             | Petition signed by at least 25% of the households on the street and/or Councillor’s request                                                                                                                                                    |                                                                                           | Yes<br>Petition received        |     |
| Warrant 2<br>Safety Criteria<br><br>[all three criteria must be fulfilled to satisfy warrant]      | 2.1<br>Sidewalks            | Are there continuous sidewalks on at least one side of street [both sides for collector of higher classification]<br><b>OR</b><br>On streets where no sidewalks exist, installation of sidewalks on at least one side must first be considered |                                                                                           | Yes                             |     |
|                                                                                                    | 2.2<br>Road Grade           | Road grade does not exceed 8%<br>[Traffic calming measures must not be installed at or near these locations where grade exceeds 8%]                                                                                                            |                                                                                           | Yes                             |     |
|                                                                                                    | 2.3<br>Emergency Response   | Emergency Services have noted that the impact of traffic calming, specifically speed humps, <u>will not</u> significantly affect service delivery                                                                                              |                                                                                           | Comments have been requested    |     |
| Warrant 3<br>Technical Requirement<br><br>[all four criteria must be fulfilled to satisfy warrant] | 3.1<br>Minimum Speed        | The 85 <sup>th</sup> percentile speed must be a minimum of 10 km/h over the warranted speed limit and the volume warrant [3.2] must be fulfilled*                                                                                              |                                                                                           | Yes<br>(50 km/h)                |     |
|                                                                                                    | 3.2<br>Traffic Volumes      | <b>Local Road</b><br>Traffic volume must be between 1,000 and 8,000 vehicles per day                                                                                                                                                           | <b>Collector Road</b><br>Traffic volumes must be between 2,500 and 8,000 vehicles per day | Yes<br>(1,614 vpd)              |     |
|                                                                                                    | 3.3<br>Minimum Block Length | On streets where mid-block traffic calming measures are proposed, the minimum block length must exceed 120 metres                                                                                                                              |                                                                                           | Yes                             |     |
|                                                                                                    | 3.4<br>Transit Service      | Impacts on regularly scheduled Toronto Transit Service vehicles will not be significant [as determined in consultation with TTC staff]                                                                                                         |                                                                                           | No TTC service on Pineway Blvd. |     |
| Warranted [Yes/No]                                                                                 |                             |                                                                                                                                                                                                                                                |                                                                                           |                                 | YES |

\*If the 85<sup>th</sup> percentile [speed at or below which the majority of motorists feel comfortable traveling under the existing roadway conditions] exceeds the warranted speed limit by a minimum of 15 km/h, the volume warrant [3.2] does not apply

It should be noted that if significant impacts are expected on adjacent streets, these streets would be included in the study process
