COMMENTS

TPA generally refreshes the pavement markings (parking stalls, transverse lines, turn arrows, hatching, etc., on a biennial or more frequent basis if needed through a regular planned maintenance program. This same approach is applied to the surface commuter parking lots TPA operates on behalf of the TTC. From time to time throughout the term, TPA and/or TTC may open new parking facilities, or existing facilities may sustain damage to pavement surfaces and the markings which require repair. To accommodate

these circumstances, the call documents included a requirement that the successful proponent also provide a unit price quote for painting stalls and any other pavement marking requirements. The repair/contingency amounts noted in Recommendation 1 above in this report reflect past experience in this regard.

The following summarizes the details of the staff review and recommendations:

- A panel of three TPA Operations and two TPA Finance staff conducted evaluations of the three (3) proponent submissions in accordance with the evaluation criteria established in the RFQ documents.
- All three proponents exhibited the capability and capacity to meet the specified requirements.
- Attachment 1: Summary Tender Details - Diamond Line Painting and Attachment 2: Low Bidder Diamond Line Painting Tender Details, to this report of the Acting President provide summaries and detailed information with regard to the number of stalls, and tendered amounts for the low bidder, Diamond Line Painting.
- Diamond Line Painting submitted the lowest cost submission.

Based on the foregoing, staff recommend that the bid of Diamond Line Painting be accepted.
