ATTACHMENT 3: COMPETITOR RATES ANALYSIS

A competitor rate analysis is completed to assist in the review of parking rates at TPA facilities. TPA Board Policy 2-1, Parking Rates – Off Street Facilities includes guidelines that must be considered when reviewing the parking rates at TPA facilities against the rates of competitor facilities (e.g. privately-owned/operated parking facilities offering parking to the general public (private lots). These guidelines state that:

1. the half-hourly rate at TPA facilities should normally be less than 75 percent of the average of nearby competitor rates; and,

2. the day maximum at TPA facilities should normally be not less than the average of nearby competitor rates (benchmarked to competitors’ early bird rates where appropriate).

These benchmarks were established to support the TPAs mandate of encouraging turnover in short-term parking as a way of supporting local businesses. In meeting this objective, TPA provides its customers with affordable, convenient, clean and safe parking options (first guideline) while using pricing to discourage discretionary commuter travel by car (second guideline). These principles remain core to TPA operations, and largely of the City as reflected in the transportation and parking policies of the Official Plan.

In addition to half-hour and day maximum rates, monthly permit rates are examined to ensure that TPA rates are consistent with competitors. A complete review of monthly permit rates is contained in Attachment 4: Monthly Rates Analysis.
