Subject: Bus drawing for St. Victor

Here is the drawing for in front of the school.

We have 75m distance to work with form crosswalk to west parking lot.

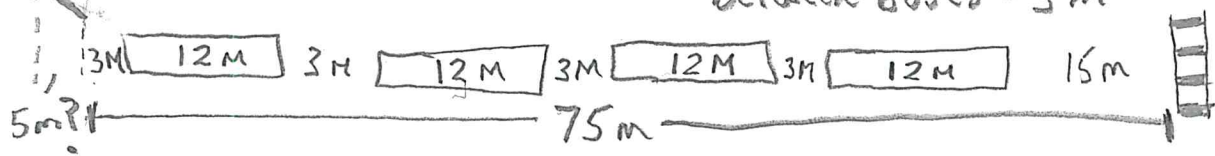

Buses are 12m with distance between buses of 3m. If we use the 9m regulation as stated in the previous email I sent with what we can find online for bylaws, then our 4 buses fit exactly in the space. If we use a 15m regulation(?) then we are 12 metres short.

That is the information we are hoping get be relayed to council Please advise, thanks

Required
 $(15+15) + (4 \times 12) + (3 \times 3) = 87m - 12m$ more needed.

$9+9 + (4 \times 12) + (3 \times 3) = 75m$
 Fits exactly

Map data ©2019, Map data ©2019 5m

- Bus = 12m
- between buses - 3m
