Danforth and Jones Intersection Changes

Yesterday I visited the intersection of Dundas and Jones with community members and senior transportation staff. Unfortunately the intersection is not wide enough for a full Dutch intersection.

However there are a number of changes that can be made to improve cycling safety. The changes that were discussed will require Transportation to think creatively and try out things that have not been done previously in Toronto.

This motion directs Transportation to begin that process. I hope you support it.

Recommendation:

1. Traffic Operations work in coordination with the Director of Transportation Planning and Capital Programs to implement changes to the Dundas and Jones intersection, to increase bike safety and minimize bike and vehicular interaction, particularly at the NE at the corner, and report to the September meeting of Toronto and East York Community Council for any required approvals.

Sincerely,

Paula Fletcher
City Councillor
