Chair, Toronto and East York Community Council
Toronto City Hall

Knox Avenue: Slowing Down Traffic and Keeping People Safe

Dear Chair and Members of the Toronto and East York Community Council,

Knox Avenue is a one-way street in Ward 14 that connects Eastern Avenue and Queen Street. As such it experiences high volumes of traffic. It also has a contraflow cycle lane on it that connects to Eastern Avenue. The street has speed humps, but residents are interested in additional measures to slow down traffic and keep people safe.

I am asking that you support the following recommendations.

Recommendations:

1. Toronto and East York Community Council request Transportation Services report to the December TEYCC meeting on the following items:
 - a. Reviewing signage
 - b. Additional Separation between the Cycle Lane and Traffic
 - c. Investigate if reversing the direction of Knox Avenue would reduce cut-through traffic
 - d. Curb Radius Reduction at Queen and Knox
 - e. Additional speed humps between the existing humps

Sincerely,

Paula Fletcher
City Councillor
Ward 14, Toronto – Danforth
100 Queen St. W
