## **Arborist Report & Tree Planting Plan for 175 Walmer Rd.**

Purpose of Report: To supply the City of Toronto with information for a removal application for one 36cm DBH White Spruce

Date Prepared: April 9, 2019

Prepared For: [REDACTED] 175 Walmer Rd [REDACTED]

Prepared By: Troy Boughner, Ontario Certified Arborist, Sales Representative, Davey Tree Expert Co. of Canada Ltd., 10 Jethro Road, Downsview, Ontario M3L 1G9, 416-241-7191, troy.boughner@davey.com

Trees Location: Backyard

Tree Species: White Spruce

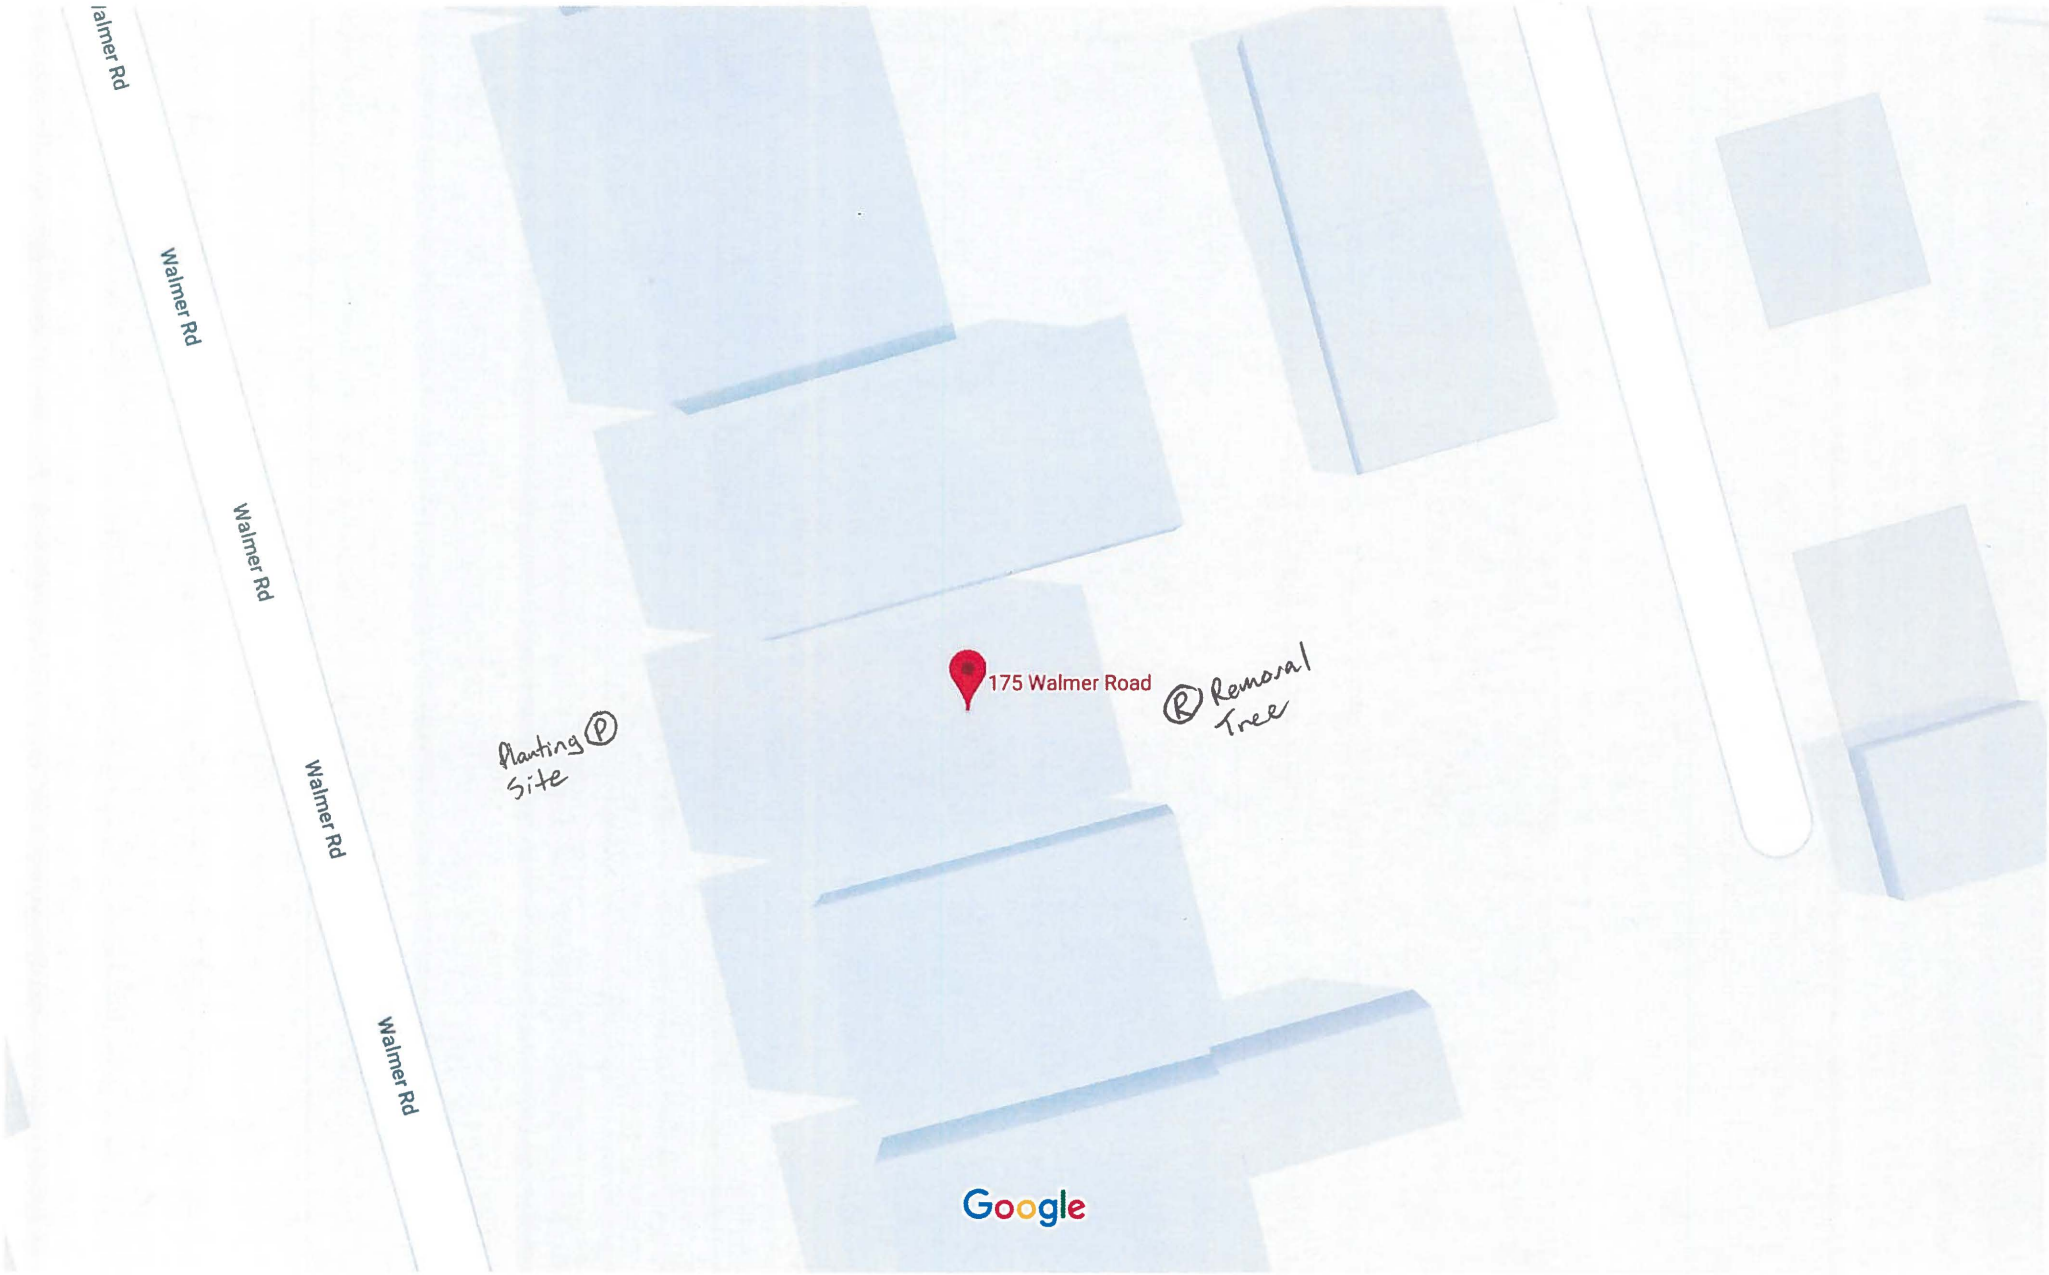

Tree Diameter: 36cm DBH

Tree Description: This tree is in fairly poor condition. It has been losing needles due to a fungal disease, causing needle cast. This tree is located very close to the house and limbs are interfering with the service lines. There is construction next door that may also cause issues for the tree as well. This tree should be removed and replaced with a large growing shade tree in a more suitable location.

Replacement Tree Planting: Mr Strowger will be planting a 50mm Tulip tree as a replacement tree. Please see enclosed site map for location.

Regards,
