Darnel Harris
Executive Director
Our Greenway

Dear Darnel,

We have appreciated learning about the work you and your team are doing to advance Our Greenway, including your work with the City of Toronto. Based on the information you shared, we understand that there is great potential for Our Greenway to connect northwest Toronto – from Keele Street along Downsview Park, to DUKE Heights and York University through to the Emery Business Improvement Area by Highway 400, Albion Islington BIA, and ultimately Humber College.

Improved connectivity is an objective that has been echoed by the vast majority of participants in our id8 Downsview consultation to date. Both Northcrest and Canada Lands Company are supportive of improving connections in and around the Downsview area and will also be looking for opportunities to enhance connections across the rail line. These efforts, once implemented, will bring mobility improvements for the broader neighbourhood and for current and future residents and employees of the Downsview Lands. We're looking forward to future discussions with the Our Greenway team to continue exploring ways to coordinate our efforts.

Sincerely,

Chris Eby
Executive Vice-President
Northcrest Developments
