

## City Council

### Notice of Motion

MM14.11	ACTION			Ward: 8
---------	--------	--	--	---------

**Encouraging Electric Vehicle Use Through Adequate Electric Charging Station Infrastructure for all New Major Residential Development Applications and Building Designs on Dufferin Street from Eglinton Avenue West to Highway 401 - by Councillor Mike Colle, seconded by Councillor Ana Bailão**

*\* Notice of this Motion has been given.*

*\* This Motion is subject to referral to the Planning and Housing Committee. A two-thirds vote is required to waive referral.*

### Recommendations

Councillor Mike Colle, seconded by Councillor Ana Bailão, recommends that:

1. City Council request the Chief Planner and Executive Director, City Planning to report on the feasibility of accelerating the plans of transition to include Electric Charging Station Infrastructure in all new major residential development applications and building designs in order to reduce the use of traditional diesel or gasoline powered vehicles, which would help improve air quality on the Dufferin Corridor between Eglinton Avenue West to Highway 401.

### Summary

Given the existing levels of traffic congestion on Dufferin Street caused by some of the highest levels of gridlock of any Major City arterial roads, and with the unprecedented level of residential development applications being proposed from Eglinton Avenue to Highway 401 on Dufferin Street, it is essential to accelerate the plans of transforming our City into a low carbon zero emissions community.
