

Mayor Tory, Councilors Layton & Matlow and President Gertler

I was shocked and appalled to see the proposed 14 Storey monstrosity you plan to approve on Queen's Park. I understand U of T has many other perfectly good sites that they can use for this size of building and urge you to vote against it. I agree with the Queen's Park Coalition that this would be a terrible mistake and a blot on Queen's Park and the City's reputation.

I am a double U of T grad (BA 71 and MBA 85) and re enrolled as a non-degree student last fall to take courses that have become of great interest to me. I am also one of the great grandsons of Sir Joseph Flavelle who generously donated his home to U of T. To further crowd the Queen's Park space adjacent to Flavelle House would be an affront to this and all other heritage buildings on the campus.
