**Infrastructure and Environment Committee Meeting, March 23, 2021
IE20.12: ActiveTO – Lessons Learned from 2020 and Next Steps for 2021**

Dear Chair and members of the Infrastructure and Environment Committee,

The South Eglinton Ratepayers' and Residents' Association (SERRA) represents the community in the southeast quadrant of the Yonge-Eglinton Secondary Plan area. SERRA has proudly served our community for 50+ years.

Our area includes the northern portion and termination of the proposed "installation of a temporary ActiveTO complete street pilot on Yonge Street between Bloor Street and Davisville Avenue/Chaplin Crescent".

We fully support the temporary pilot and the northern extension of a protected bikeway and on Duplex Avenue.

We would support a short extension of the protected bikeway north of Davisville to facilitate a safer ending of the northern terminus of the bike lanes and to allow for safe dispersal of cycling traffic onto local neighbourhood streets.

We recognize a concern about impacts to surface transit operations and impacts to those with limited mobility and accessibility needs, especially considering expected ongoing Yonge Line subway closures due to Yonge Line system upgrades.

Our previous letter in support (for IE15.11) is attached below.

In the longer term, we continue to support protected bike lanes on Yonge, continuing north to Lawrence Avenue.

Thank you for your consideration,

Respectfully submitted,

Andy Gort,
President, SERRA

cc. Mayor John Tory
Councillor Josh Matlow, Ward 12
Councillor Jaye Robinson, Ward 15
Councillor Mike Colle, Ward 8
Councillor Mike Layton, Ward 11

IE15.11: Support for Midtown Yonge Bikeway proposal.

Dear Mayor Tory and Members of City Council,

The South Eglinton Ratepayers' and Residents' Association (SERRA) represents the community in the South East quadrant of the Yonge-Eglinton Secondary Plan area. SERRA has proudly served our community for 50+ years.

SERRA strongly supports a temporary protected bikeway along Yonge Street from south of St Clair Avenue to north of Lawrence following the complete streets approach applied to Danforth Avenue, with implementation by the second quarter of 2021.

There is no doubt that COVID-19 has changed the way we live. As the city slowly re-opens, we have concerns about our ability to get around safely, especially along major transit corridors, where physical distancing will be challenging on subways and buses.

In Midtown, before the pandemic, 450,000 people used the Line 1 Yonge subway. During reopening, if even a fraction of people who used transit opt for cars, our roadways would seize up. As Mayor Tory has said, "we need a safety valve for transit."

A bikeway on Yonge will relieve pressure on the Yonge subway and provide people with a safe alternative to transit, will offer an affordable and healthy way to get around, and will help local businesses recover by bringing more customers to street level. A safe, protected bikeway on Yonge will encourage people to transition to cycling and free up capacity on the subway and buses for those who have no alternative.

There is ample room for a protected bikeway in Midtown. CafeTO installations along Yonge would benefit from a protected bikeway providing a safety buffer between patio seating and vehicle traffic. Our local businesses are already experiencing a surge in people shopping by bike. And as you know from other ActiveTO installations on major transit corridors such as Bloor and Danforth, temporary bikeways afford real-time testing of design in a fraction of the cost and time associated with major studies.

ActiveTO has shown us that Toronto can quickly implement innovative solutions for active transportation as part of the pandemic recovery.

Lastly, we would like to point out that construction at Yonge & Eglinton and Yonge & Bloor has constrained vehicular traffic to two lanes, which will continue for several years. Between these two bottlenecks, Yonge widens to 4-6 lanes, providing plenty of room to maintain vehicular traffic lanes and add protected, safe bike lanes.

Thank you for your consideration,

Respectfully submitted,

Andy Gort,
President, SERRA
