Dear Councillors,

December 1st, 2021

I am submitting these comments for distribution to the Infrastructure and Environment Committee regarding the agenda item IE26.14, Missing Link Sidewalk Program - Dwight Avenue Sidewalk Installation, to be considered on 2 Dec 2021, and also available here: <http://app.toronto.ca/tmmis/viewAgendaItemHistory.do...>

I request that the committee reject this recommendation and instead direct city staff, in consultation with the school, the TDSB, and local residents, to produce an alternate street improvement plan for Dwight Avenue that better meets the community's needs in order to save existing trees, which have mature canopy.

Please do your part & keep these beautiful trees thriving!!

Rob
