SUBJECT: All way stop control on Presley Ave and Nancy Ave

Dear Scarborough Community Council,

At the request of my office and on behalf of a constituent, Transportation Services has reviewed the need for all-way stop control at the intersection of Presley Ave. and Nancy Ave. Based on the assessment undertaken, Transportation Services recommends the installation of an all-way stop control at this intersection, as the warrant criteria was met.

Analysis:

Conclusions are based on an All-Way Stop Control Warrant study using traffic volumes recorded over a two-hour period during the morning and afternoon peak hours of a typical weekday. This study has been evaluated using the updated warrant calculations as adopted by City Council on July 16, 2019 in the Vision Zero 2.0 Road Safety Plan report. The results of our study indicate that the technical warrants for the installation of this type of traffic control device are met.

Recommendation:

Transportation Services recommends and supports the installation of an all-way stop control at Presley Ave. and Nancy Ave.

1. Scarborough Community Council authorize all-way compulsory stop control at the intersection of Presley Avenue and Nancy Avenue.

Sincerely,

Gary Crawford
Councillor, Ward 20
Scarborough Southwest
