Dear Chair and Members of Toronto and East York Community Council,

RE: Speed Hump Requests in Ward 11

As traffic has been starting to increase with businesses reopening, residents are noting a huge increase in traffic and speed of that traffic through their neighbourhoods. Where possible, Community Council must be taking steps to reduce the speed of vehicles through the provision of speed humps where residents would like to see them.

Speed humps have proven successful at often keeping cars below the speed limit while increasing the safety of the street and raising the awareness of the driver to their surroundings.

My office has received a series of petitions I will be submitting to staff to support these requests to see their installation studied and eventual installation, on as quick a timeline as possible.

Recommendation:

1. Toronto and East York Community Council investigate and report back to Toronto and East York Community Council on the potential to install speed humps on:
 - a. Summerhill Ave – From Yonge St to Summerhill Gardens
 - b. Castle Frank Rd – From the Don Valley exit to Dale Ave – 2 speed humps
 - c. Rosedale Heights Dr – From MacLennan Ave and Errington Ave
 - d. Brunswick Avenue – From College Street to Ulster Street

Thank you,

Councillor Mike Layton
Ward 11, University-Rosedale
