**Re: PH 30.3: Our Plan Toronto: Protected Major Transit Station Area Delineations - Downtown and City-wide Interpretation Policies - Final Report**

**This is to advise that I support the recommendations and proposals outlined in the letter (January 11th), 2022) from Liz Driver of Campbell House regarding the necessity to change the proposed zoning designations for the north west corner of Queen St and University Avenue. This site is used as parkland and green space and is a key component of Relic Park and the Grange Green Plan. The designation should be "zero" and not 4.**

**I have communicated this concern to Councillor Joe Cressy, who has been asked by my neighbours to move an amendment to the staff report.**
