Subject: "Visioning the Future: First Nations, Inuit, and Métis Population and Public Health"
Date: February 24, 2022 3:10:44 PM

This is a new publication on "Visioning the Future: First Nations, Inuit, and Métis Population and Public Health" from the National Collaborating Centre for the Determinants of Health and partners for the Public Health Agency of Canada <https://nccph.ca/projects/reports-to-accompany-the-chief-public-health-officer-of-canadas-report-2021>.

It might help guide our work going forward.

thanks,

Kate

CANADA'S CHIEF PUBLIC HEALTH OFFICER 2021 REPORT AND ASSOCIATED COMMISSIONED REPORTS

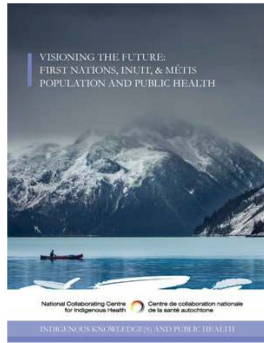

Canada's Chief Public Health Officer (CPHO), Dr. Theresa Tam, has released her latest report on the State of Public Health in Canada 2021, ***A Vision to Transform Canada's Public Health System***. This year's report describes the impacts of the COVID-19 pandemic and provides a vision to transform Canada's public health system, in order to be better prepared for the next public health crisis and to help all people in Canada to achieve better health.

To read the 2021 CPHO report, visit Canada.ca/CPHOreport.

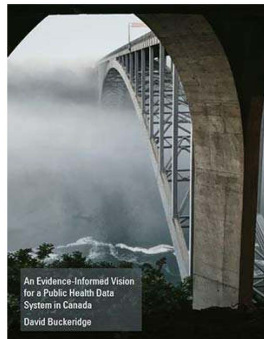

To inform the development of this report the Office of the CPHO has commissioned four independent reports. In an effort to allow broader dissemination of these reports, the National Collaborating Centres for Public Health, in partnership with the authors and the Office of the CPHO worked together to make them publicly available in English and French.

The commissioned reports will be released as soon as the editing process is finalized and will be posted online on this website. Make sure to visit our website regularly!

Report led by Dr. Margo Greenwood, National Collaborating Centre for Indigenous Health and Dr. Evan Adams, Deputy Chief Medical Officer of Public Health at Indigenous Services Canada
