Subject: Comments for 2022.IE31.20 on July 7, 2022 Infrastructure and Environment Committee

Dear Infrastructure and Environment Committee Members and Members of Council,

I am in full support of the motions before the committee to encourage consideration of alternate locations for the Don Valley Layover, and to ensure that provincial and federal government officials are made aware of the expected impact the proposed layover facility and tracks have on the surrounding ravine parkland.

I encourage the City to work with Metrolinx and other levels of government to protect the green space and ravine parkland in the Lower Don Valley, while identifying other approaches to meeting important transit system requirements.

Thank you for considering my submission to the Committee.
