Toronto and East York Community Council
100 Queen Street West
Toronto, ON M5H 2N2

Dear Chair and Members,

RE: Bollard Installations – Ward 9 (Davenport)

BACKGROUND:

Over the past year, I have heard from residents across Ward 9 (Davenport) requesting bollard installations and replacements on account of safety concerns. Bollards act as both a physical and visual barrier, protecting people and property from damage without impeding the public right of way.

In the reported cases, residents have incurred significant property damage and a diminished quality of life. Commonly used applications such as signage and traditional police enforcement have been ineffective and do not provide enough of a deterrent against vehicle impact.

As a result, I am recommending the installation of rigid, impact resistant, fixed-in-place bollards at the following locations to protect property and enhance community safety.

RECOMMENDATIONS:

1. Toronto and East York Community Council direct the General Manager, Transportation Services, install bollards in the first east/west public lane on the east side of Lisgar Street north of Queen Street West along the flankage of 105 Lisgar Street.
2. Toronto and East York Community Council direct the General Manager, Transportation Services, install bollards on both sides of the first east/west public lane on the west side of Dovercourt Road, north of Geary Avenue at the flankages of 1102 and 1104 Dovercourt Road.
3. Toronto and East York Community Council direct the General Manager, Transportation Services, install a bollard in the north-south public lane on the south side of Dupont Street, east of Symmington Avenue, at the flankage of 1493 Dupont Street.

Thank you for your consideration.

Sincerely,

Ana Bailão
Deputy Mayor
Councillor, Ward 9 – Davenport
