

Attachment 6: Port Lands Flood Protection Construction Photographs

Pictures taken 2022-2023

An aerial view of the Port Lands as of late fall/winter 2022. View is looking south, showing the three new Cherry Street bridges (north and south).

Construction of Canoe Cove, in Promontory Park South, looking southeast as of late fall/winter 2022. The restored Atlas Crane and the new Cherry Street (south) bridge is in the background.

Summer 2022 construction of the new river valley with riverbanks, looking southwest.

Summer 2022 construction of the new river valley with riverbanks, looking southeast.

Excavation of the river valley, along the new Cherry Street (south) bridge as of winter 2023. Excavation is near the 'west plug' where the new river valley will connect to Polson Slip, becoming the new mouth of the Don River into Lake Ontario.

Ice Management Area, between Villiers Street and Commissioners Street, looking south as of winter 2023. The new Commissioners Street bridge is in the background.
