2022 Capital Budget Reduced Capital Project Spending to Address COVID-19 Funding Shortfall For the Period Ended December 31, 2022 (\$000s)

\$300 million Required Capital Adjustment

As previously reported to Council, the backstop strategy included the requirement to pause and potentially reduce up to \$300 million in approved 2022 Capital projects. The \$300 million reflected 7.4% of the 2022 Tax Supported Capital Budget and was proportionately allocated across all City Programs and Agencies based on the level of Debt/Capital from Current (CFC) or Provincial Gas Tax funding within the 2022 Capital Budget.

The allocation predominantly impacts the City's capital investments for Toronto Transit Commission (TTC); Transportation Services; Parks, Forestry & Recreation; and Corporate Real Estate Management, which combined, reflect \$236.0 million or nearly 80% of the total \$300 million impact.

Appendix 6 of this report provides further details on impacted projects and notes the impacts by program or agency across the following three categories:

1. Cancelled or Permanently Reduced Projects (\$97.9 million)

• Capital projects or programs initially paused to now be permanently reduced.

• For reductions to capital programs (i.e. major road rehabilitation), specific capital work or discrete locations were not necessarily eliminated, rather 2023 work plans were developed with reduced available funds based on the requirement for paused capital work.

2. 2022 Budget Reductions with Initiatives Incorporated in Future Capital Plans (\$188.3 million)

• Projects reduced from the 2022 Capital Plan and subsequently added back in futures years either through additions approved as part of the 2023 – 2032 Capital Plan or accommodated within approved and available future year funding.

3. Other Adjustments (\$13.7 million)

• Predominantly reflects adjustments in available funding sources enabling new nondebt funding to be added to existing projects, freeing up CFC funding to be eliminated from the Capital Plan, without an overall change to total project funding.

2022 will mark the second instance since the start of the pandemic where capital projects were reduced or adjusted to offset COVID-19 impacts with the first occurrence applying \$263 million in 2020 capital underspending to the COVID-19 backstop. There is currently no further direction to pause or reduce any 2023 Capital work that was approved as part of the 2023 budget process.

Appendix 6 2022 Capital Budget Reduced Capital Project Spending to Address COVID-19 Funding Shortfall For the Period Ended December 31, 2022 (\$000s)
