

Re: Item EX9.14 Advancing Waterfront East Light Rail Transit

Dear Mayor Chow, Deputy Mayor Malik, and members of the Executive Committee,

More Transit Southern Ontario is a volunteer based organisation focusing on advocating for making transit more accessible, frequent, fast, reliable, safe, and integrated.

We support the advancement of the Waterfront East LRT project to 60% design and the continued implementation of the WELRT project.

Provision of convenient, time-saving rapid transit service to the future Villiers Island precinct will be essential to not only allow residents of the portlands to connect with the subway and GO train and bus services at Union station, but also to connect the public parks currently under construction as part of the Portlands Flood Prevention Project. We look forward to seeing this project proceeding forward and eventually built for a connected, vibrant eastern waterfront in Toronto.

Best regards,

Max Cheung,
More Transit Southern Ontario
