To: Chair and Members of General Government Committee
City Hall, 100 Queen St W
Toronto ON, M5H 2N2

Dear Chair and Members,

Request for review of engineering services capital delivery models

A number of general concerns were raised during review of GG2.11 Award of Ariba Document Number 3448368603 to CH2M Hill Canada Limited and Stantec Consulting Limited for Professional Engineering Services for Phase 5 of the Basement Flooding Protection Program, specifically, the practice of contracting to a single vendor to design, project manage, administer construction and provide post construction services.

Recommendation:

1. The Interim Chief Engineer and Executive Director of Engineering and Construction Services and the Chief Procurement Officer in consultation with the General Manager of Transportation Services and the General Manager of Toronto Water to review the engineering services capital delivery models including in-house, program management, traditional consultant design & construction, and hybrid models used for large complex municipal infrastructure programs and projects including Basement Flooding, Bridge Rehabilitation, SOGR Road Rehabilitation and Major Infrastructure, and report back with recommendations to the General Government Committee by the end of 2023.

Sincerely,

Gord Perks, City Councillor,
Ward 4 Parkdale-High Park
