¹ Attachment 1B - Performance Review and Investment - March 31, 2023 (Aon)

Detailed market value performance information with benchmarks, attribution, and commentaries can be found in the reports prepared by the investment consultant (Aon) in Attachment 1A and 1B. These returns do not include cash and other short term holdings of the LTF and SF and reflect the performance of the external investment managers only.

Compliance to the Investment Policy is monitored daily and reported monthly. For the three month period ending March 31, 2023, the monthly compliance reports prepared by the custodian (RBC), and compliance statements prepared by the four investment managers with segregated mandates are included in Attachment 4. For the year 2022, all funds managed are compliant with the Investment Policy. The City's auditor, KPMG LLP, will perform the Investment Policy audit during the second half of 2023.

The remainder of this report along with Attachments 2, 3, and 5 provide further information regarding the funding, asset mix re-balancing, breakdown of holdings by investment manager, quarterly realized income, flow-of-funds, and other details.

Performance Overview and Cash Flows

Sinking Fund (SF)

Activities and Balances:

As of March 31, 2023, external investment managers held \$1.9 billion of invested assets. Table 2, 3 and 4 below show the Sinking Fund balances and asset mix that are managed by the external investment managers as at March 31, 2023. Details on 2021 to 2023 funding to investment managers are included in Attachment 2. Attachment 3 (Tables A3-1 and A3-2) provides quarterly information.

The total Sinking Fund balance (including segregated cash) at the end of the March 31, 2023 was \$2.2 billion on a market value basis. This balance was comprised of 14 percent segregated short term fund (cash and equivalents), 63 percent fixed income, and 23 percent global equities.

Cash in excess of the 10% of the fund that is set aside for the upcoming investment in real assets and amount set aside for any upcoming repayments will be allocated to the external investment managers. As contributions to the Sinking Fund accumulate, asset mix rebalancing activities are planned periodically to re-align towards the asset mix target.

Market Return Performance:

The externally managed Sinking Fund outperformed its market return benchmark by 30 basis points for the first quarter of 2023 although it underperformed the benchmark by 30 basis points for the 12 month period ending March 31, 2023.

As shown in Table 5 below, the fixed income portion of the Sinking Fund outperformed the benchmark by 20 basis points for the first quarter of 2023 as well as for the 12

month period ending March 31, 2023. Although the global equity portion underperformed the benchmark by 50 basis points for the first quarter of 2023, it has outperformed by 310 basis points for the 12 month period ending March 31, 2023.

The blended benchmark for the total fund is calculated based on the weighted average return of the target asset mix including real assets, the plan is currently transitioning towards the target asset mix and is not fully allocated at this point.

Attachment 3 (Table A3-3 and A3-4) provides a highlighted performance breakdown by each investment manager.

The investment consultant (Aon) has also provided a performance breakdown for the Sinking Fund in Attachment 1A and 1B.

Sinking Fund - Book Return Performance:

The book return performance only considers actual earned income from interest, dividends, capital gains/losses and other realized income. It does not include any unrealized capital gains which are taken into account for market value performance. The book value methodology is currently being calculated for accounting and budget purposes.

On a book return basis, the Sinking Fund earned \$14.5 million (unaudited) yielding a return of 2.5 percent in Q1 2023 as shown in Table 6 below.

For historical quarterly earned income, please refer to Attachment 3 (Table A3-5).

Flow of Funds - Sinking Fund

In the first quarter of 2023, there were no outflows from the Sinking Fund as there was no debt maturing. The next debt maturity will be in September 2023 for \$300 million which will be paid out of the Sinking Fund.

On the debt issuance side, the City of Toronto issued \$350 million of long-term debentures in April this year so far as shown in Table 7 below.

Long Term Fund (LTF)

Activities and Balances:

As of March 31, 2023, external investment managers held \$3.4 billion of invested assets for the Long Term Fund (LTF). The LTF has a total balance of \$3.7 billion (including cash balances). There were no funding contributions or withdrawals for the LTF in the first quarter of 2023 (Attachment 2).

Tables 8, 9 and 10 below show the balances and asset mix of the LTF managed by the six investment managers as at March 31, 2023. Attachment 3 contains quarterly balances of the LTF (Table A3-6 and A3-7).

¹ Includes both Active and Inactive sub-funds

The current internally managed short term fund portion of the LTF (10.1%) is primarily set aside for the upcoming investment in real assets. The total fund balance (including segregated short term fund) as at March 31, 2022 was \$3.7 billion in market value. This balance is comprised of 12 percent in segregated short term fund and cash under the management of external investment managers, 64 percent in fixed income securities, and 24 percent in global equities.

Market Return Performance:

The total externally actively managed LTF outperformed its blended benchmark by 30 and 20 basis points for the first quarter of 2023 and the 12 month period ending March 31, 2023 respectively.

As shown in Table 11 below, the fixed income portion of the LTF outperformed the benchmark by 20 and 70 basis points for the first quarter of 2023 and the 12 month period respectively ending March 31, 2023. While the global equity underperformed the benchmark by 60 basis points for the first quarter of 2023, it actually outperformed the benchmark by 310 basis points for the 12 month period ending March 31, 2023.

The blended benchmark for the total fund is calculated based on the weighted average return of the target asset mix including real assets, the plan is currently transitioning towards the target asset mix and is not yet fully allocated at this point. Further details on the performance for each investment manager and fund performance commentaries are prepared by the investment consultant (Aon) as included in Attachment 1A and 1B. Attachment 3 provides a summary of historical quarterly performance by investment managers (Table A3-8 and A3-9).

² FTSE Canada Universe Bond Index.

³ Both LGIM and Fiera CCF use the MSCI World Index as the performance benchmark because they do not invest in emerging markets that are included in the MSCI ACWI Index. The Long Term Fund global equity composite, as an aggregate, is still benchmarked against the MSCI ACWI Index.

⁴ Based on the weighted average return of the target asset mix including real assets

The fixed income portion of the LTF is under the management of Connor, Clark & Lunn Investment Management (CC&L) and Leith Wheeler Investment Counsel Ltd (LW). Both managers have separated their portfolios into an Active sub-fund and an Inactive sub-fund. The proceeds from sales or maturities in the Inactive sub-funds have been reinvested and moved to the Active sub-fund. Comparing to a year ago, the remaining Inactive sub-fund balances are now reduced to approximately 1.7 percent (\$41 million) from 7.5 percent (\$201 million) of the assets under management of LW and CCL. The managers are only measured and compensated for the Active sub-funds. The Inactive sub-fund holds the inherited illiquid bonds (mostly municipal bonds). The manager will continue to progressively incorporate the Inactive sub-fund into the Active sub-fund either through bond maturities or liquidation when market conditions are appropriate.

Book Return Performance:

The book return performance only considers actual earned income from interest, dividends, capital gains/losses and other realized income. It does not include any unrealized capital gains which are taken into account for market value performance. The book value methodology is currently being calculated for accounting and budget purposes.

On a book return basis, investment managers earned \$17.2 million in the LTF yielding a return of 1.9 percent in Q1 2023 as shown in Table 12 below. Quarterly earned income can be found in Attachment 3 (Table A3-10).

Table 12 - Long Term Fund Earned Income (\$millions)

Earned Income Requirement Update

As of March 31, 2023, the LTF earned \$17.2 million (unaudited) year to date as compared to the budgeted \$60.5 million.

Investment income from the LTF and City's internally managed Short Term Fund will be first allocated to the Board expenses, then contributed to the City's reserve funds, and lastly spent on the City's operating plan. The estimated amount of required earned investment income contribution from the LTF to the City's operating plan for 2023 is \$109.6 million. Any contribution shortfall from the LTF can be supplemented by the income generated from the Short Term Fund.

Flow of Funds - Long Term Fund

As reported in December 2019, \$500 million of deemed excess liquidity was transferred to the LTF on November 1, 2019 from the Short Term Fund. The \$500 million was allocated as per asset mix outlined in the Board approved Investment Plan.

In 2020, \$496 million an internal transfer was completed within the LTF to fund new equity managers: Fiera Capital (\$120 million) and LGIM (\$376 million).

Due to the pandemic situation since 2020 and the recent ongoing funding uncertainties from the other level of governments, the City has been holding onto a higher level of working capital balance. Staff will continue to re-assess the City's liquidity position periodically and advise accordingly if there is any deemed excess liquidity to be transferred to the LTF.

Investment Policy and Plan Compliance

According to provincial regulations, the Investment Policy must be reviewed by City Council at least annually. Council received the Investment Policy in June 2022 and December 2021 with the semi-annual performance report. At those meetings, there were no recommendations to update or change the policy. Previous to this, Council adopted the updated Investment Policy on June 29, 2020.

The City's auditor, KPMG LLP, will perform the Investment Policy audit during the second half of 2023.

All investments in the Sinking Fund and Long Term Fund are consistent and in compliance with the Investment Policy and the Investment Plan for the first quarter as of March 31, 2023 (Attachment 4).
