March 20, 2023

To: Chair and members of Infrastructure and Environment Committee

Re: IE29.11 Oversight and Accountability within the Utility Cut Process

In a 2022 motion, IE29.11 Oversight and Accountability within the Utility Cut Process, was approved to report back to the Infrastructure and Environment Committee in the third quarter of 2023 on a number of items to improve on the level of service around third party utility construction permits. Through the motion below, I am requesting staff to investigate an additional item to improve customer service through the utility permitting process.

Recommendation:

1. Infrastructure & Environment Committee request the General Manager, Transportation Services to review requirements for project information signage at utility construction sites on public property and report back to the Infrastructure and Environment Committee in the third quarter of 2023 as part of the report requested through IE29.11.

Sincerely,

Anthony Perruzza
City of Toronto Councillor
