Re: IE7.4 - Updates on Vision Zero Road Safety Initiatives

Dear committee members,

Walk Toronto would like to express its strong support for the measures to strengthen Toronto's Vision Zero program that are included in item IE7.4.

In particular, we strongly support the move to expand the criteria for establishing community safety zones beyond just school zones. There are many places in Toronto where community safety needs to be improved in addition to school zones. It is important that the City of Toronto be able, for example, to install speed cameras at dangerous locations that see a great deal of speeding but that are not adjacent to schools.

Thank you,

Dylan Reid
