

All-Way Stop Control - Yeomans Road and Alexis Boulevard

Date: June 2, 2023

To: North York Community Council

From: Director, Traffic Management, Transportation Services

Wards: Ward 6 – York Centre

SUMMARY

This staff report is about a matter that Community Council has delegated authority from City Council to make a final decision.

Transportation Services is requesting approval to install all-way stop control at the intersection of Yeomans Road and Alexis Boulevard. Based on the assessment undertaken, the installation of all-way stop control is recommended and should enhance safety for all road users.

RECOMMENDATIONS

The Director, Traffic Management, Transportation Services recommends that:

1. North York Community Council authorize all-way compulsory stop control at the intersection of Yeomans Road and Alexis Boulevard.

FINANCIAL IMPACT

The estimated costs associated with the proposed amendment is \$1,200.00. Funding is anticipated to be available within the Transportation Services 2023 Operating and Capital Budgets.

DECISION HISTORY

This report addresses a new initiative.

COMMENTS

At the request of the Ward Councillor, on behalf of area residents, Transportation Services investigated the feasibility of installing all-way stop control at the intersection of Yeomans Road and Alexis Boulevard.

Existing Conditions

Yeomans Road is characterized by the following conditions:

- It is a two-lane, north-south, local roadway
- It operates two-way traffic on a pavement width of approximately 8.5 metres
- The daily two-way traffic volume is approximately 2,700 vehicles
- The speed limit is 30 km/h
- Heavy trucks are prohibited at all times
- There is no TTC service provided
- There are sidewalks located on both sides of the street

Alexis Boulevard is characterized by the following conditions:

- It is a two-lane, east-west, local roadway
- It operates two-way traffic on a pavement width of approximately 8.5 metres
- The daily two-way traffic volume is approximately 1,100 vehicles
- The speed limit is 30 km/h
- Heavy trucks are prohibited at all times
- There is no TTC service provided
- There are sidewalks located on the south side of the street

These two streets intersect to form a right-angled four-leg intersection, with right-of-way controlled by stop signs for eastbound and westbound traffic on Alexis Avenue.

A map of the area is included in Attachment 1.

Study Results

In order for all-way stop control to be warranted at an intersection established criteria must be satisfied. The warrants consist of four components, including collision history, total vehicle volume, combined vehicle and pedestrian volumes crossing the major road and the percentage of traffic on the major road.

Collision history provided by the Toronto Police Service for the three-year period ending December 31, 2022, disclosed that there have been no reported collisions that occurred at this intersection.

Transportation Services conducted an all-way stop control study on April 26, 2023 at the subject intersection. The results of the study were evaluated against the warrant criteria for all-way stop control as adopted by City Council. The evaluation is summarized in Table 1.

Table 1: All-Way Stop Control Study at Yeomans Road and Alexis Boulevard

No.	Warrant Type	Actual	Required	Satisfied (Yes/No)
A	Number of Potentially Preventable Collisions (January 1, 2020 to December 31, 2022)	0	6	No
B1	Average Vehicle Volumes	252/hour	250/hour	Yes
B2	Combined Vehicle & Pedestrian Volumes Crossing Major Road (Average)	85/hour	100/hour	No
B3	Percentage of Traffic on Major Street	70%	≤70%	Yes

In order for the all-way stop control to be technically warranted, either Warrant A must be met or Warrant B1 or B2 combined with Warrant B3 must be achieved. Based on the study results, the technical warrants for the installation of all-way stop control are satisfied. Therefore, it is recommended that all-way stop control be installed at the intersection of Yeomans Road and Alexis Boulevard.

The Ward Councillor has been advised of the recommendation of this staff report.
